

This notification is to inform you that as an owner of a surface discharging wastewater treatment system, you will be directly affected by changes in the private sewage disposal code as mandated by pending legislation House Bill HB 0170. This will require you to apply for a Federal EPA NPDES permit, provide bi-annual sampling and laboratory testing of the treated effluent coming from your wastewater treatment system. The additional permit, sampling and laboratory analysis will add \$500.00 - \$1,000.00 per year in addition to your annual service policy. **Compliance will be mandatory.**

We urge you to complete the section below, tear off and mail the lower section, TODAY, to Governor Quinn's office opposing HB 0170. You may also contact Governor Quinn's office at (217) 782-6830 to voice your opposition. There is limited time to respond to this matter.

For further information visit WWW.ILGA.GOV , search Bill # HB 0170.

This notification has been provided by the Onsite Wastewater Professionals of Illinois (OWPI). For the latest information related to this matter visit WWW.OWPI.NET

-- Tear Here ----- Tear Here ----- Tear Here --

The Honorable Governor Patrick Quinn,

As a citizen of the State of Illinois and an owner of a Class I surface discharging wastewater treatment system, I **oppose** HB 0170 due to the substantial increase of operational costs this bill will create. I urge you to **veto** HB 0170.

Respectfully,
